

We are Achmea

Insurance today extends beyond our homes, our cars and our pensions. Modern insurance companies struggle with how to manage liability related to the use of drones, the risk associated with driverless vehicles, the rental of goods in the sharing economy, and the insurance implications of other recent trends. These complex issues have created the need for new standards for the capacity, strength and flexibility of systems, networks, databases and websites. This is certainly the case at Achmea: as the largest and most trusted digital insurance company in the Netherlands and the owner of domestic brands such as Centraal Beheer, Interpolis, Zilveren Kruis and FBTO, we employ roughly 12,500 people across our various Dutch sites. With around 10 million customers, each with their own risks and insurance needs, our responsibility cannot be overestimated. We offer a challenging work environment with endless opportunities for personal development, perfectly suited for ambitious recent university graduates with the confidence to take centre stage early on in their careers and support us in our ongoing efforts to reinvent insurance.

Achmea & Data

Working with Big Data is the future. At Achmea, we deal with massive amounts of data every day – which can provide us with the key to finding new marketing solutions and can lead to valuable insights for developing new products and other innovations. While some of this data helps our customers to prevent loss and damage, we use other data to calculate and evaluate risk.

Achmea is currently looking for **Data Analysts**: professionals with a gift for interpreting and connecting data, who can get right to the heart of complex information and facts and manage to penetrate the underlying issue. They know just how valuable data can be and how to use it in providing helpful advice. If you have what it takes to be a talented Data Analyst, including the ability to connect the proverbial dots, play the game now! In addition, Achmea is looking for **Future Actuaries**: professionals who can accurately identify and assess risk, who want to have an impact on the pricing of insurance products, and who have the sense of responsibility to protect and monitor our solvency, profitability and technical resources. Needless to say, you would hold a key role in our organisation.

IT & Achmea

As a data-intensive organisation, Achmea conducts a growing number of transactions with customers and other constituents through various digital channels and makes the most of all the available modern technologies. Do you have what it takes to hold a key position, one that involves being part of a radical transformation and the integration of claims systems and loss management systems? Achmea is currently looking for **IT Management Trainees** and **IT Experts**: university graduates who are keen to start a dynamic career in IT. Don't miss this opportunity to discover your talents and passions!

A Career at Achmea

As an innovative employer, Achmea offers internships, part-time jobs for students, and full-time positions in a modern and driven organisation. The issues we deal with every day are complex and relevant to the wider society. In addition to an informal atmosphere, we offer excellent benefits and generous opportunities for personal development. We have created a

traineeship and training programme specifically designed for data analysts and specialised IT workers, allowing you to develop your full potential as a professional in terms of both professional knowhow and skills. You also have the option to enrol in the actuarial training programme at the [Actuarial Institute](#) or start your career with the IT Management Traineeship. You will be given a great deal of flexibility and personal responsibility, and in addition we offer opportunities for working 'anywhere, anytime'. Click [here](#) for images of our various sites in the Netherlands.

If you would like to help make the difference, have a look around and discover some of the challenges you will be expected to take on at Achmea. Alternatively, you can also go straight to [our Internships and Vacancies](#). We need your talent now!
